Dry Eye Level 2

COURSE SUMMARY

After the great success of our two-day ‘Getting to Grips with Dry Eye’ course, the Johnson & Johnson Vision Care Institute has compiled the next chapter. This one-day course will take your knowledge to the next level and give you more confidence to treat those more challenging patients. Developed by experts in the field, this course will bring you up to date with new developments in all aspects of dry eye disease.

As Eye Care Professionals, more and more of your patients are presenting with the signs and/or symptoms of a tear film disorder. With evolving roles in primary care, you as Optometrists, Independent Prescribing Optometrists and Contact Lens Opticians are in a position to treat and manage this complex condition for the benefit of your patients.

Pre-Requisites
To ensure maximum impact, this course is only open to those who have attended the highly successful ‘Getting to Grips with Dry Eye’ course.

This innovative one-day course will:

- Guide you through the latest developments of dry eye disease
- Provide you with a series of hands-on workshops to practice new investigative and diagnostic techniques, including; lid margin debridement, meibomian gland expression, tear film osmolarity analysis and lid cleansing using Blephex
- Discuss the latest medical management of dry eye disease
- Help you to differentiate more complex conditions resulting in dry eye disease
- Enable you to be more confident in recognizing and managing contact lens discomfort
- Endorse your understanding by looking at a series of case discussion scenarios

WHAT THE COURSE INVOLVES

- Remote digital pre-course elements to review key learnings from the two-day ‘Getting to Grips with Dry Eye’ course
- Experience the state-of-the-art facilities at the Johnson & Johnson Vision Care Institute
- Take part in a variety of interactive workshops to experience new technologies and techniques
- Interact with peers and experts through patient management discussions
- Digital post-course elements to ensure that you are supported as you implement your newly gained skills and knowledge into daily practice.
LEARNING OBJECTIVES

- To build on the skills and knowledge gained from the two-day Getting to Grips with Dry Eye course by understanding the new developments in managing and treating dry eye disease
- To be able to confidently investigate and manage more complex cases of dry eye disease
- To effectively recognize and manage contact lens related dry eye disease
- To be able to effectively communicate dry eye disease to patients
- To successfully implement skills and knowledge into daily practice.
