Instructions For Use
Daily Wear (Frequent Replacement) And Extended Wear ACUVUE® Contact Lenses

Verify revision is current prior to use.

You should immediately remove the lenses, and promptly contact your Eye Care Professional.

NOTE: Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a
standard with transmissibility of less than 5% UVB and 50% UVA radiation.

Problems with contact lenses or lens care products could result in serious injury to the eye. You should be cautioned
that if you use oral contraceptives (birth control pills), you could develop changes in vision or comfort
problems with contact lenses or lens care products.

Be aware that wearing a darkened OASYS® with Transitions® lenses on only one eye is not recommended
because it may cause binocular vision (feeling of the lens in the eye), ocular photophobia, and visual
information. Always inform your Eye Care Professional if you experience any of these symptoms
or if you have a change in vision.

When any of the above symptoms occur, a serious eye condition may be present. YOU SHOULD IMMEDIATELY
SEE YOUR EYE CARE PROFESSIONAL.

1. DIRECTIONS FOR USE

When you first get your lenses, be sure you are able to put the lenses on or have someone else available who can
remove the lenses for you before leaving your Eye Care Professional’s office.

DO NOT use the sterile blister package, opened, damaged or after the expiry date.

Use tweezers or other tools to remove your lenses from the lens container. Use of other tools may damage the
lens and/or reduce vision.

When you first get your lenses, be sure you are able to put the lenses on or have someone else available
who can remove the lenses for you before leaving your Eye Care Professional’s office.

DO NOT use contact lenses to winter, including while asleep. If lenses have been exposed to water, you
should discard them. To reduce the chance of getting an infection.

DO NOT remove contact lenses to water, including while asleep. If lenses have been exposed to water, you
should discard them. To reduce the chance of getting an infection.

You should immediately remove the lenses, and promptly contact your Eye Care Professional.

Eye Problems, including problems with contact lenses, can develop rapidly and lead to loss of vision. If you experience any of the following symptoms:

- Eye Discomfort
- Excessive Tearing
- Eye Redness
